Art Unit: 3612

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

Page 2

form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United

States.

2. Claim 28 as newly presented is rejected under 35 U.S.C. 102(b) as being

anticipated by Morris et al.

Note Morris et al teaches securing of stacks of upper and lower containers and includes

connectors 30+, and a bridging stabilizer (e.g. 26+) placed at adjacent ones of the

connectors so as to link the connectors. The linked connector/stabilizer arrangement is

positioned on the lower containers before upper ones of the container stacks are placed

thereon. Additionally note, the center portion of the plate elements of the bridging

stabilizer(s) that extends across the gap between connected containers defines a

container spacer as broadly claimed – note figures 2 and 3 etc.

3. Claims 29-31 are objected to as being dependent upon a rejected base claim,

but would be allowable if rewritten in independent form including all of the limitations of

the base claim and any intervening claims.

Claims 20-26 are allowed.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Stephen Gordon whose telephone number is (571) 272-
